Quick Facts About Firefighting

1631 The first fire ordinance was adopted in Boston.

1648 four Fire Wardens were appointed in New Amsterdam (now New York). Later eight more citizens were appointed to the first "RattleWatch". These volunteers would patrol the streets at night looking for fires carrying large wooden rattles. If a fire was seen, the men spun the rattles to alert citizens then directed the responding citizens to form a bucket brigades.

1676 Boston received its first "state of the art" fire engine from England. The three-foot long, 18 inch wide wooden box had handles and a direct force pump that fed a small hose. The engine was kept filled with water by bucket brigades.

1678 Thomas Atkins became the first Fire Engine Captain.

1736 Benjamin Franklin incorporated the Union Fire Company in Philadelphia.
